CONTENTS, FIZIKA B, VOLUME 15 (2006)

Note: The page numbering of articles is done when articles are ready for publication and placed online on Fizika web pages. In these Contents, the articles are rearranged according to the branches of physics represented in the journal. Therefore, page numbering is not consecutive.

GENERAL PHYSICS

- L. Kocis*: An alternative to quantum mechanics, Part II: Interference of beams coming from a single source 85
- M. Ribarič and L. Šušteršič*: Two basic problems posed by quantum scattering of fundamental particles 115

NUCLEAR PHYSICS

- A. Abdelsalam, M. S. El-Nagdy, E. A. Shaat, N. Ali-Mossa, O. M. Osman, Z. Abou-Moussa, S. Kamel, N. Rashed, W. Osman, M. E. Hafiz, B. M. Badawy and S. Magd Eldin*: Study of relativistic forward-backward hadron production in the interactions of ^3He and ^4He with emulsion nuclei at Dubna energy 9
- M. T. Hussein, N. M. Hassan, N. M. Sadek and J. Elsweedy*: Multi-particle correlation among grey particles emitted in nucleus-nucleus interactions 51
- Dipak Ghosh, Argha Deb, Prabir Kumar Haldar, Parthasarathi Ghosh and Syed Imtiaz Ahmed*: Fragmentation of targets in muon-nucleus interactions at (420 ± 45) GeV – strong two-particle azimuthal correlation 107
- D. Ghosh, A. Deb, P. K. Haldar and S. R. Sahoo*: Maximum pseudorapidity gap analysis in nuclear interactions from a few GeV to few hundred GeV 133
- Dipak Ghosh, Argha Deb, Keya Dutta (Chattopadhyay), Rinku Sarkar and Ishita Dutta*: Multifractality and slow particle production in ^{24}Mg –AgBr interaction at 4.5 AGeV energy 183
- J. Honzátko, V. A. Khitrov, C. Panteleev, A. M. Sukhovej and I. Tomandl*: Intense two-step cascades and γ -decay scheme of the ^{118}Sn compound nucleus 189

PARTICLES AND FIELDS

- N. M. Hassan*: Neutrino-nucleon interaction through intermediate vector boson 37
- Dipak Ghosh, Argha Deb, Samabrata Sarkar, Soumee D. Sengupta, Anwesa Gupta and Alak Kumar*: Measurement of charge of projectile fragments – search for fractionally-charged projectile fragments at energy 14.5 AGeV 207

ASTROPHYSICS AND COSMOLOGY

- F. Rahaman, B. C. Bhui, A. Ghosh and R. Mondal*: Vacuumless cosmic strings in Einstein-Cartan theory 1
- G. P. Singh, S. Kotambar and A. Pradhan*: Cosmological models with a variable Λ term in higher dimensional spacetime 23
- A. Pradhan, V. Rai and S. Otarod*: Plane symmetric inhomogeneous bulk viscous domain wall in Lyra geometry 57

<i>M. Salti, O. Aydogdu, A. Havare and M. Korunur:</i> The massless spin-1 particles in the rotating space-times	71
<i>S. B. Faruque and Sh. Huda:</i> Periastron shift in the orbit of a particle orbiting a Kerr black hole	99
<i>A. Pradhan, K. Srivastava and R. P. Singh:</i> Spherically-symmetric nonsingular models with variable Λ term in relativistic cosmology	141
<i>A. R. El-Nabulsi:</i> Non-minimal dark energy and cosmic acceleration in higher-derivative dual gravity	157
<i>A. Pradhan, K. Jotania and A. Rai:</i> Generation of Bianchi-type V bulk viscous cosmological models with time-dependent Λ -term	163

Authors are advised to consult “Instructions for Authors” on Fizika web pages at <http://fizika.phy.hr> before starting preparations of the manuscript for submission for publication in Fizika B.

INSTRUCTIONS

Fizika B is a journal publishing the results of original experimental and theoretical research work in general physics, nuclear physics, particles and fields and astrophysics. Contributions written in English, French, German or Russian are accepted. They should be submitted in duplicate, typed on good quality paper on one side only, with double spacing and wide margins, with original drawings of figures and one further copy of the title and abstract in English if the original is in a different language. The abstract should not exceed 600 letters including all symbols.

The front page of each manuscript should include the title of the paper, author's full name(s), affiliation(s) with full address(es) and preferably the UDC and PACS classification numbers. To speed up communication, authors are encouraged to provide e-mail address, FAX and telephone numbers. Unless requested otherwise, the e-mail address and/or FAX number will be published with the author's address.

International system of units (SI) should be used whenever possible, particularly in quoting final results and in table and figure inscriptions.

The figures should preferably be produced by a laser printer on good-quality white paper or drawn in Indian ink on tracing paper. Figures should be fully lettered. Black and white photographs on glossy paper with high contrast are accepted. Reduction to about 1/3 of the original size is usually used. The lettering in the figures must be large enough to make the final size at least 1.5 mm high. All figures should be numbered consecutively with Arabic numerals in order of appearance in the text, and each should have a descriptive caption.

Each table should be numbered sequentially and should have a descriptive caption.

References should be numbered consecutively with Arabic numbers in square brackets. In the text the abbreviation et al. should not be used for papers written by two authors. All references should be listed on a separate sheet and **should include the names of all authors**. (Except for very large collaborations of more than about 10 authors.) The references should be written using the following style: [5] S. Smith and J. K. Jones, Phys. Rev. **295** (1972) 422.

Equations should be written carefully and clearly and numbered sequentially on the right-hand side. Special care should be paid to all symbols that can be misread, confused or are ambiguous (e.g. to distinguish between subscripts and superscripts). Please add a note in the margin to avoid such ambiguities or to explain special symbols.

The footnotes should be numbered in Arabic superscripts and placed at the bottom of the page in which they appear in the manuscript.

When typing the manuscript, authors are strongly advised to consult recent issues of Fizika.

A shorter paper, not subdivided into sections, of less than 600 words in length, with a modest number of illustrations and a short abstract, should be submitted as "Letter to the Editor".

For refereeing purposes only, papers including figures may also be sent by FAX. After the paper has been accepted for publication, the author(s) will be advised to send two original copies, including figures, to the Editor for further processing.

To speed up the publication, the authors of accepted papers are encouraged to send a source file of their papers in standard L^AT_EX (style "article") or in plain T_EX without any author-defined styles and/or macros, and figures in PostScript format. This can be done by electronic mail or on a floppy disc (MS-DOS). Please read "Instructions for Authors" on our home pages.

When submitting a paper, the authors should include a covering letter, signed

by one of the authors, clearly requesting publication of the paper in the journal Fizika.

The submission of the paper will be taken to imply that no copyright will thereby be infringed.

There is no page charge for publication of papers and authors are entitled to 30 free reprints.

The manuscripts of papers accepted for publication are not returned.

Manuscripts for publication and all correspondence should be sent to: The Editor, Fizika, Bijenička c. 32, HR-10000 Zagreb, CROATIA. FAX +385-1-4680 336 or +385-1-4680 055, e-mail: ilakovac@phy.hr.
