

# FIZIKA B

A JOURNAL OF EXPERIMENTAL AND  
THEORETICAL PHYSICS

GENERAL PHYSICS  
NUCLEAR PHYSICS  
PARTICLES AND FIELDS  
ASTROPHYSICS AND COSMOLOGY

Recognized by the European Physical Society

Volume 19

2010

Numbers 1 – 4

Zagreb

Last regular issue - Fizika B (Zagreb) is closing down

I. ŠLAUS R. Bošković Institute, Zagreb, Croatia		H. ULLRICH Universität Karlsruhe, Karlsruhe, Germany

Subscription rate per volume of Fizika B (one printed issue in 2001): For Croatia: Members of the Croatian Physical Society 50 HRK, institutions 300 HRK; foreign orders \$ 60. Correspondence and/or calls regarding subscriptions, renewals, address changes and missing or damaged copies should be addressed to:

Editorial Office, Fizika, Bijenička cesta 32, HR-10000 Zagreb, CROATIA  
Tel. & Fax. (direct) +385-1-4680055, Exchange: Tel. +385-1-4605571,  
Fax. +385-1-4480336, E-mail: ilakovac@phy.hr

Payments should be made by bank transfer to our account, check, bank money order or international postal money order.

Payments in HRK should be made to bank account no. 30102-678-4202

Payments in foreign currency should be made

- bank transfer to ZBZ dd SWIFT ZABA HRXX, account no. 25731-32 39 853 (HFD)
- checks should be sent to the Editorial Office, the payment to: The Croatian Physical Society, account no. 25731-32 39 853.

The journal Fizika B (Zagreb) is financially supported by the Ministry of Science, Education and Sports of the Republic of Croatia

Fizika B (Zagreb) is available online (URL: <http://fizika.phy.hr>) and on CD-ROM. CD-ROM editions of Fizika B (Zagreb) Vol. 6 (1997) and further issues are available.

CONTENTS, FIZIKA B, VOLUME 19 (2010)  
(by subfields)

Note: The page numbering of articles is done when articles are ready for publication and placed online on Fizika web pages. In these Contents, the articles are rearranged according to the subfields represented in the journal. Therefore, page numbering is not consecutive.

GENERAL PHYSICS

- I. Radinschi, F. Rahaman, M. Kalam and K. Chakraborty:* Classical electron model with non-static conformal symmetry ..... 125
- B. Thelin:* A linear relationship in stellar optical spectra using the new intensity formula ..... 329

NUCLEAR PHYSICS

- D. Ghosh, A. Deb, S. Biswas, P. Mandal, R. Sarkar and D. Bhattacharya:* Evidence of energy dependence of self-similar cascading rate of pions in nuclear collision ..... 223
- K. Boubaker Ben Mahmoud:* A polynomial analytical solution to the one-speed neutron transport equation in slab geometry under inherently verified Mark-Marshak boundary conditions ..... 257
- A. C. Das Ghosh, Goutam Sau, S. K. Biswas and S. Bhattacharyya:* On production of 'soft' particles in Au+Au and Pb+Pb collisions at high energies ..... 283

PARTICLES AND FIELDS

- T. S. T. Ali:* Pion-nucleon sigma term in the linear sigma model ..... 9

ASTROPHYSICS AND COSMOLOGY

- R. K. Tiwari and U. Dwivedi:* Kantowski-Sachs cosmological models with time-varying  $G$  and  $\Lambda$  ..... 1
- R. C. Sahu and L. K. Mohapatra:* A class of inhomogeneous mesonic perfect fluid models with time-dependent  $\Lambda$ -term ..... 17
- V. K. Yadav, L. Yadav and A. K. Yadav:* Bianchi type-III anisotropic universes with a cloud of strings in Lyra's geometry ..... 29
- G. Mohanty and G. Ch. Samanta:* Five-dimensional string cosmological models with massive scalar field ..... 43
- A. K. Yadav:* Lyra's cosmology of inhomogeneous universe with electromagnetic field ..... 53

<i>H. Amirhashchi and H. Zainuddin:</i> Bianchi type-III string cosmological models for stiff and anti-stiff fluid in general relativity .....	81
<i>R. Bali, P. Kumawat and S. Sharma:</i> Bianchi type-I stiff-fluid tilted cosmological model with bulk viscosity in general relativity .....	91
<i>R. A. El-Nabulsi:</i> Fractional action-like variational approach, perturbed Einstein's gravity and new cosmology .....	103
<i>D. Ghosh, A. Deb, S. Bhattacharyya and U. Datta:</i> Dependence of the correlation coefficient on the size of the phase-space interval in high-energy interactions .....	113
<i>R. A. El-Nabulsi:</i> $D^{2/3}$ generates more quantum vacuum energy .....	135
<i>G. Mohanty, G. C. Samanta and K. L. Mahanta:</i> Kaluza-Klein FRW stiff fluid cosmological model in Lyra manifold .....	143
<i>M. Zeyauddin and Sh. Ram:</i> Spatially homogeneous Bianchi type-V cosmological models in Brans-Dicke theory .....	149
<i>S. D. Katore and A. Y. Shaikh:</i> Bianchi type-I cosmological model in self-creation cosmology .....	161
<i>R. A. El-Nabulsi:</i> Modified Gauss-Bonnet-Brans-Dicke cosmology with freezing scalar potentials .....	169
<i>M. Sabido, J. Socorro and L. Arturo Ureña-López:</i> Classical and quantum cosmology of the Sáez-Ballester theory .....	177
<i>R. A. El-Nabulsi:</i> A late-time cosmological model with slowly growing gravitational coupling constant and decaying vacuum energy density .....	187
<i>R. K. Tiwari, S. S. Tiwari and P. Pandey:</i> A cosmological model with varying $G$ and $\Lambda$ term in general relativity .....	193
<i>G. Mohanty, S. N. Dhal and G. C. Samanta:</i> Bianchi type-V cosmological model in Lyra manifold .....	201
<i>R. K. Tiwari and S. Kumar:</i> Bianchi type-V models in self-creation cosmology with constant deceleration parameter .....	211
<i>R. A. El-Nabulsi:</i> Accelerated expansion of the higher-dimensional spatially flat universe .....	233
<i>G. Mohanty and G. C. Samanta:</i> Five-dimensional LRS Bianchi type-1 string cosmological model in general relativity .....	239
<i>R. K. Tiwari:</i> Plane symmetric cosmological models in self creation cosmology .....	247

<i>R. A. El-Nabulsi:</i> Higher-dimensional non-singular cosmology dominated by a varying cosmological constant .....	269
<i>R. P. Singh and L. Yadav:</i> Cylindrically symmetric magnetized inhomogeneous string cosmological models of perfect fluid distribution with variable magnetic permeability .....	305
<i>S. D. Katore, K. S. Adhav, R. S. Rane and V. B. Kurkure:</i> String cosmological model with strange quark matter in Kantowski-Sachs space-time .....	323

## Editorial

I am informing our readers, with much regret, that on Jan. 14 2011 the Steering Committee of the Croatian Physical Society brought an abrupt decision to close down the only scientific journals of physics in Croatia, *Fizika A* and *Fizika B*, taking effect the same day. The decision put the editors of the journals in a rather difficult position because many manuscripts were in the process of evaluation, some were accepted but not typeset, etc. The mandate of the editors was extended to allow for the completion of vols. 19 of the journals before the end of May 2011. The editors decided to extend the evaluation procedure and acceptance of manuscripts for publication until mid February 2011. Consequently, vol. 19 (2010) includes also some articles that were accepted in 2011. The typesetting and placement of the accepted articles online was finished by the end of May 2011. *Fizika A* joined some other journals which formed the new journal *EPJ-Plus*.

The main reason for the closing down of the journals are the financial problems which were caused by the world financial crisis. Unfortunately, this occurs after 65 years of publishing in Croatia of original scientific work in physics by authors from most countries in the world.

In the summer of 1945, right after the end of the II World War, at the time of poverty and political strains, the Section of Mathematics and Physics of the Croatian Society of Natural Sciences in Zagreb founded the joint journal of mathematics, physics and astronomy with the title *Glasnik matematički, fizički i astronomski*. The editors were professors of the Faculty of Science and Mathematics of the Zagreb University: Đ. Kurepa (1945-1950), S. Bilinski (1951-1954), S. Bilinski and Z. Janković (1955-1958), S. Bilinski and P. Papić (1959-1962) and S. Mardešić (1963-1965). In the following 20 years, the journal published 20 volumes, one every year.

The Section of Mathematics and Physics founded in 1949 its own Society. The new Society of Mathematics and Physics decided in 1965 to dedicate the journal *Glasnik matematički, fizički i astronomski* to mathematics only, under the name *Glasnik matematički* (still appearing regularly), and also accepted the proposal of the physicists that a new journal dedicated to the original scientific articles in physics be founded under the title *Fizika*, but as a journal of all six republics of the former Yugoslavia. The agreement among the physical societies of the six republics took some time, so the first volume of the new journal appeared in 1968. The editor was A. Moljk (Ljubljana) and technical editor M. Kasumović (Zagreb).

The European Physical Society (EPS), founded in 1968, approved in 1969 that the new journal *Fizika* bears the EPS logo and insignia “Europhysics Journal”. In a general revision, EPS repealed the right to several journals, including *Fizika*. Later, K. Ilakovac, as editor of the journals

*Fizika A* and *Fizika B*, regained the right in 1999, so the two journals bear the EPS logo and insignia “Europhysics Journal” from 2000 on.

After M. Kasumović resigned as technical editor, new editors, editorial board and council were elected in 1978. The editor became G. Alaga and technical editor V. Šips. The new leadership greatly improved the journal *Fizika*, both in quality of the published articles and in technical appearance. G. Alaga made contacts in many scientific centres, mostly through his personal acquaintances. So a considerable number of manuscripts was submitted from well known centres of physical research in the world. Unfortunately, G. Alaga died in the summer of 1988, the journal *Fizika* was without an editor for almost three years, and V. Šips (technical editor) ran the journal.

In the summer of 1991, K. Ilakovac was appointed as editor of *Fizika*. At the time, the war in Croatia started. That and the following years were very difficult times in Croatia. At the time and for several more years, the communications via electronic mail were in its infancy. We did have electronic mail since 1992, but many authors and referees did not, or were not used to it. So for several years the communications with authors and referees were by conventional mail. But in Croatia, because of the war, postal communications, especially airmail, were rather slow and unreliable. In spite of the difficulties, the publishing went on schedule.

K. Ilakovac proposed to the Croatian Physical Society splitting of the journal *Fizika* into two journals, *Fizika A* and *Fizika B*. This was accepted in the autumn of 1991, and first volumes of the two journals were vol. 1 (1992). In 1994 a switch from classical typesetting (casting in lead) was changed to typesetting in LaTeX in computers. At first the figures were mounted photographs, but soon either scanning of figures received on paper, or computer files of figures were used with their inclusion in the LaTeX files. Although for a number of years complete computer files of articles were prepared, the files of the figures could not be kept because of the small capacity of memories available at the time. That changed in 1996 when computers with larger hard discs were acquired, so all volumes published since 1996 are online (<http://fizika.phy.hr>) with free access. Some of the previous articles are also online, but without figures. We hope, all volumes since 1992 will be completed soon.

As the editor of *Fizika* and subsequently of *Fizika A* and *Fizika B*, and my co-editors and other collaborators, too, for over 20 years, after much work and efforts, huge number of working hours, many actions with the aim of many improvements, find it very disappointing that a sorrowful destiny struck our journals.

K. Ilakovac
